

Şafak Sönmez

Senior Software Engineer | Technical Lead

Fintech • Distributed Systems • High-Throughput & Real-Time Platforms

Istanbul, Türkiye • Remote (EMEA) • info@safaksonmez.com • safaksonmez.com • linkedin.com/in/safaksonmez • github.com/safaksonmez

PROFILE

Senior software engineer and hands-on technical lead with 7+ years of experience building backend-heavy products across fintech, trading, telemetry, and real-time systems. Own architecture, integrations, production delivery, and performance-critical backend work across .NET, Go, Node.js/TypeScript, Python/Django, and Rust. Track record includes a 10x telemetry-processing throughput improvement and multiple greenfield systems delivered to production.

PROFESSIONAL EXPERIENCE

Backend Developer / Technical Lead, Incodi Software Development

Nov 2024 - Present

- Primary backend technical owner across fintech products, responsible for architecture decisions, integrations, production delivery, reliability, and troubleshooting.
- Bitexen Exchange / Custody:** built multi-tenant Django workflows for KYC lifecycle sync, customer/account provisioning, deposits, withdrawals, balances, statements, and B2B integrations.
- Bitexen Derivatives:** co-developed a Rust-based high-throughput streaming engine with a design target of up to 10,000 trades/sec and worked on MT5-related account, history, liquidation, and integration flows.
- Dynamic Markets:** own end-to-end technical delivery across an approximately 10-service self-service platform, spanning backend/frontend development, payment integrations, infrastructure, releases, and production operations.

Tech stack: Python/Django, Rust, .NET, PostgreSQL, MSSQL, Redis, RabbitMQ, Docker, Kubernetes, Nginx, CI/CD.

Backend Developer / Technical Lead, Yukatech AS

Jan 2022 - Oct 2024

- Promoted to Backend Lead in the second year; led backend architecture and production delivery across RouteControl and YukaTrack.
- Migrated RouteControl processing from Node.js to Go, increasing throughput from ~80 to ~800 telemetry records/sec (10x) using goroutines and concurrency-safe synchronization patterns.
- Built Teltonika binary telemetry, Go/gRPC services, geolocation and route-generation workflows, and operated a custom Nominatim stack across shared and product-specific repositories.

Tech stack: Go, Node.js, gRPC, MongoDB, Redis, RabbitMQ, MySQL, Nominatim, Docker, Linux.

Backend Developer (Part-Time), GoAction

May 2022 - Feb 2023

- Built event-driven Node.js services and API integrations on AWS Lambda, API Gateway, DynamoDB, and AWS SDK.

Tech stack: Node.js, AWS Lambda, API Gateway, DynamoDB.

Full Stack / Backend Developer, Independent

Sep 2019 - Dec 2021

- Delivered commercial .NET, Node.js, Python, Laravel, and React applications, including real-time integrations and crypto-exchange/arbitrage tooling.

LEADERSHIP & OWNERSHIP

Technical ownership - Primary backend technical owner across multiple fintech products at Incodi, covering architecture, integrations, releases, reliability, and production troubleshooting.

Team leadership - Promoted to Backend Lead at Yukatech and separately delivered RideOn/DriveOn with an independent 3-person product team.

INDEPENDENT PRODUCTS

RideOn - Employee transportation tracking product built with an independent 3-person team; backend services, MQTT/live telemetry, boarding/drop-off flows, React Native integration, and production deployment. Active maintenance.

DriveOn - Fleet and vehicle tracking platform built with the same independent team; real-time vehicle telemetry, fleet operations, live client flows, backend/infrastructure ownership, and ongoing development.

TECHNICAL SKILLS

Backend: C#/.NET, Go, Node.js/TypeScript, Python/Django, Rust, Laravel

Architecture: Distributed systems, event-driven architecture, CQRS, Event Sourcing, REST, GraphQL, gRPC

Data & Messaging: PostgreSQL, MSSQL, MySQL, MongoDB, Redis, DynamoDB, RabbitMQ, MQTT

Platform: Docker, Kubernetes, Linux, AWS Lambda/API Gateway, CI/CD, Nginx, Traefik

EDUCATION & LANGUAGES

Çanakkale Onsekiz Mart University - Computer Programming, Associate Degree (2017-2019) • Turkish: Native • English: Advanced
